

1

ABSTRACT OF THE DISCLOSURE

2 Disclosed is a display system displaying a picture on a screen by a video signal from a
3 computer and serving as an input device of a computer coupled to the display system. The display
4 system includes an input part through which a user inputs data, a signal processing part converting
5 a signal inputted from the input part into a signal to be identified by the computer, a data interface
6 between the computer and the display system, and a controlling part transmitting the signal inputted
7 from the input part to the computer via the signal processing part and the data interface.
